## INTRAD Bed Head Protection

There is a range of different INTRAD Bed Head Protection designs to satisfy various cost and performance requirements.

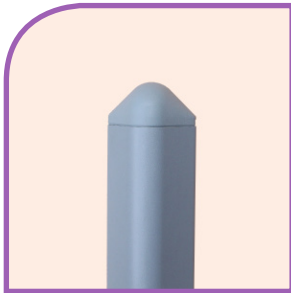

INTRAD Bed Head Protection is a visually attractive way to prevent damage to the services and wall finishes around beds by defining the bed position and preventing unwanted bed movement.

Using INTRAD Bed Head Protection keeps the bed frame away from vulnerable medical equipment whilst offering functional, practical and robust wall protection.

INTRAD Bed Head Protection is a significant contribution to reducing the damage and wear in hospital wards, care homes and dormitories behind the bed area.

## INTRAD BHB-100 Bed Head Buffer

### Vertical Bed Head Protection

Ideal protection from bed damage especially where height adjustable beds need to move without impacting the walls or medical equipment.

By installing a pair of INTRAD BHB-100 Bed Head Buffers vertically to the walls behind &/or to the side of a bed, offers protection around the bed space as well as to expensive medical gas or electrical supplies.

INTRAD BHB-100 Bed Head Buffers are supplied as a complete kit of two 1m buffers comprising cover, aluminium core, impact absorber, endstops and mounting spacers.

The PVC-U cover profile engages over a rigid aluminium core incorporating an impact absorber to provide strength and rigidity to the assembly.

### Benefits:

-  Impact resistant
-  Vertical protection
-  Supplied as a complete kit
-  Easy clean
-  Fire resistant. Class O rated

### Other benefits include:

- Low maintenance and hygienic
- Decorative
- Range of colours
- Reduces maintenance costs
- Impact absorbing design
- Cost effective
- Projects 62mm away from the wall
- Protects the bed head area from damage
- Supplied in 1m pairs

# INTRAD BHB-125 Bed Head Buffer

**INTRAD BHB-125  
Bed Head Buffer**

## INTRAD BHB-125 Bed Head Buffer

### Vertical Bed Head Protection

A pair of buffers designed for vertical installation onto walls at bed head positions where heavy duty protection is required from height adjustable beds or extra projection is required to help protect trunking systems.

INTRAD BHB-125 bed head buffers project 95mm out from the wall offering greater clearance to vulnerable medical services.

Supplied as a complete kit of two 1m buffers the INTRAD BHB-125 Bed Head Buffer comprises a contoured robust cover, aluminium core, impact absorber, wall returns and mounting spacers.

### Benefits:

-  Impact resistant
-  Vertical protection
-  Supplied as a complete kit
-  Easy clean
-  Fire resistant. Class O rated

### Other benefits include:

- Projects 95mm away from the wall
- Standard and custom sizes available
- Low maintenance and hygienic
- Decorative
- Range of colours
- Reduces maintenance costs
- Impact absorbing design
- Cost effective
- Protects the bed head area from damage
- Supplied in 1m pairs

# INTRAD BHL-100 Bed Head Locator

**INTRAD BHL-100  
Bed Head Locator**

## INTRAD BHL-100 Bed Head Locator

INTRAD BHL-100 is a horizontal buffer designed for accurate positioning of a bed in specialist care situations. The “Locating” lugs allow staff to position the bed in the same location time after time so that the clinical services are always accessible whilst also offering protection to vulnerable medical equipment.

INTRAD BHL-100 Bed Head Locators comprise cover, aluminium core, impact absorber, two locating lugs and two mounting spacers. Supplied with an internal clearance of 1000 – 1400mm. Please specify the width required when ordering.

### Benefits:

-  Locates the bed into a defined zone
-  Horizontal protection
-  Supplied as a complete kit
-  Easy clean
-  Fire resistant. Class O rated

### Other benefits include:

- Protects and preserves building interiors
- Standard and custom sizes available
- Low maintenance and hygienic
- Range of colours
- Reduces maintenance costs
- Impact absorbing design
- Projects 62mm away from the wall
