

## Royal Berkshire Hospital

INTRAD Cleanflex has been used at the Royal Berkshire Hospital in a number of wards disposal rooms to give a robust and easy to clean work area.

The Cleanflex sheet was thermoformed on site to get the best possible fit and finish. Joints were covered using the Cleanflex joint trim and the edges were silicone sealed to the skirting, door frames and ceiling to complete the installation.

Along with the Cleanflex sheet used in the disposal rooms, a number of wall protection profiles were also used to give protection to doors, corners, walls and behind the beds.

Profiles Used:-  
Cleanflex Hygienic Cladding System  
Intrad RCA Cornerguards  
Intrad Sheet  
Intrad Plate
