

**Product Code:**

**INTRAD Sheet**

**Product Description:-**

Intrad Sheet is the ideal protection for large areas such as doors and walls. It can be cut to various shapes and can be formed to give wrap around protection. Supplied with an embossed finish in 1mm & 1.5mm standard thickness.

Intrad sheet is ideal for virtually all areas of a hospital. It can be installed along side buffer rails and handrails, be standalone and have custom shapes and patterns cut out.
