INTRAD Sheet

**INTRAD Sheet
Custom Cut**

**INTRAD Sheet
Door Protection**

INTRAD Sheet

INTRAD Sheet is ideal for wall cladding protection.

With the use of colour and custom cut sheet it is possible to produce an integrated design that is practical, eye catching and hard wearing.

INTRAD Sheet gives hard wearing impact protection in heavily trafficked areas.

The damage caused by 24 hour use would very quickly require maintenance on a continual basis, whereas a simple installation using INTRAD Sheet produces low maintenance protection where it is needed. INTRAD Sheet can be used as partial or full wall cladding and can be supplied pre-cut with made to order integrated designs.

Doors receive a great deal of wear and tear. Some suffer low level foot damage mainly from pedestrians, others will require greater protection from trolleys, bins and baggage. INTRAD Sheet can be used to give a more cohesive design to door protection.

INTRAD SHEET

INTRAD Sheet

INTRAD Sheet is ideal for large area protection to walls and partitions. INTRAD Sheet is an embossed flat sheet which is adhesive bonded to the wall to give large area protection. The standard 2.44 x 1.22m sheet can be thermoformed and cut to shape giving a fully integrated finish where required.

INTRAD Sheet is extremely versatile. It can be thermoformed to fit around obstacles such as pipe boxing and ducting, neatly trimmed behind sockets and switches or simply installed as flat panels. It can also be used to compliment our wall protection rails and is often fitted between mid and low level buffers to offer complete protection to the lower half of a wall.

Benefits:

Reduces maintenance costs

Strong and resistant to impact

Easy clean

Fire resistant. Class O rated

Thermoformable

Other benefits include:

- Half Height to full height protection
- Decorative and maintenance free
- Ideal for interior walls and partitions
- Range of trims
- Colour co-ordinated protection
- Increases hygiene
- Fit around obstacles

INTRAD SHEET Custom Cut

INTRAD Sheet Custom Cut

INTRAD Sheet is ideal for large area wall protection but it is not always practical or desirable to have square cut panels. INTRAD Sheet can be cut to various shapes and sizes using existing templates or cnc machined to give simple or intricate wall pattern designs.

By mixing colours together, simple designs can have great visual impact or even be used as part of a wayfinding scheme. We will be pleased to discuss your requirements to achieve your design scheme.

Benefits:

-  Thermoformable
-  Shape cutting services available
-  Reduces maintenance costs
-  Strong and resistant to impact
-  Easy clean
-  Fire resistant. Class O rated

Other benefits include:

- Decorative and maintenance free
- Ideal for interior walls and partitions
- Colours can be mixed together
- Custom shapes and logos can also be incorporated
- Colour co-ordinated protection
- Increases hygiene
- Fit around obstacles

INTRAD SHEET Door Protection

INTRAD Sheet Door Protection

Doors receive a lot of use and can suffer from excessive damage. INTRAD Sheet is ideal for use as door protection.

INTRAD Sheet can be cut into push plates, kick plates (low level & between vision panels), half height crash plates (square or contoured) or full height cladding. It is also thermoformable around door frames to provide complete protection.

Benefits:

-  Strong and resistant to impact
-  Fire resistant. Class O rated
-  Reduces maintenance costs
-  Kick & push plates
-  Crash plates
-  Contoured crash plates
-  Full height cladding

Other benefits include:

- Reduces expensive door repairs or replacement
- Decorative and maintenance free
- Ideal for doors and partitions
- Thermoformable
